WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Over the weekend and early next week, the combination of monsoonal moisture and instability will likely lead to isolated thunderstorms in the mountains and upper foothills.
 - Minimal rainfall can be expected with these thunderstorms across very dry fuels, will yield a threat for fire.
 - A Fire Weather Watch can be expected Monday morning through the evening hours.

SOUTHERN CALIFORNIA

- No significant weather to report

WEATHER KEY POINTS

07/25/21 - 07/31/21

Sunday-Saturday

- Fire weather conditions remain elevated through the upcoming week, especially across the foothills and mountains where locally gusty winds are likely each afternoon and evening
- Isolated to scattered showers and thunderstorms remain possible each day, with the best coverage of storms in the Sierra and in the deserts and mountains of Southern Region
 - Storms will be most widespread across the state Monday into Tuesday, including a slight chance of thunderstorms in portions of Coastal Region and in Inland Region valleys
 - Some storms Sunday and Monday could produce locally heavy rainfall, leading to a slight chance for flash flooding, primarily in southern California
 - Some thunderstorms, especially in the Sierra and other northern mountains, could be relatively dry and lead to new fire starts
- Temperatures will remain warm, with low to moderate heat risk impacts possible across the state through much of the week, but no widespread excessive heat impacts are currently expected this week
